Professional Summary

Computer Science graduate with knowledge of Python, SQL, and web technologies, supported by academic projects. Strong understanding of data structures, algorithms, database management, and problem-solving techniques. Capable of developing efficient applications, collaborating in team environments, and applying technical skills to support organizational objectives.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Web Technologies: HTML5, CSS3

Frameworks: Django, Flask

Databases: MySQL, SQLite

Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming, DBMS

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Concepts: CRUD Operations, REST APIs, Authentication, Responsive Web Design, Version Control

Projects

Internship and Project Management System — Python, Django, MySQL, HTML5, CSS3, JavaScript

- Developed a full-stack web application using Python, Django, MySQL, HTML5, CSS3, and JavaScript for managing internship and project workflows.
- Integrated role-based authentication and CRUD operations to enable secure access and efficient data handling.
- Designed 6+ functional modules, including project submission, approval workflow, deadline tracking, and progress management.
- Created 3 role-based dashboards with MySQL database integration for secure project data storage and management.

AI-Powered Security Monitoring System — Python, OpenCV, Flask

- Built an AI-powered security monitoring solution using Python, OpenCV, and Flask to enable real-time video surveillance and threat analysis.
- Applied computer vision techniques to implement 3+ intelligent features, including face recognition, anomaly detection, and activity monitoring.
- Automated security event management with 3+ functionalities, including alert generation, event logging, and image capture for incident tracking.
- Developed a Flask-based web dashboard to monitor surveillance activities and manage security records efficiently.

Online Quiz Application — HTML5, CSS3, JavaScript

- Developed a responsive online quiz application using HTML5, CSS3, and JavaScript with an interactive user interface.
- Integrated 4+ core features, including secure authentication, timer-based quizzes, automatic score calculation, and leaderboard functionality.
- Implemented 3+ JavaScript functionalities, including dynamic quiz management, instant result generation, and user score tracking for performance evaluation.
- Optimized the application with responsive design and cross-browser compatibility to ensure seamless navigation across desktop, tablet, and mobile devices.

Professional Training

IBM SkillsBuild – Web Development Training (Edunet Foundation)

- Learned the basics of HTML5, CSS3, JavaScript, and responsive web design.
- Gained knowledge of frontend and web development fundamentals.
- Earned the IBM SkillsBuild Web Development Badge.

Certifications

- AI/ML Project Certificate – Fundamentals of Artificial Intelligence
- AICTE Edunet Foundation – Frontend Web Development
- Besant Technologies – Data Analytics Training Certificate

Education

Holy Mary Institute of Technology and Science

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

CGPA: 8.16
